

Security Policy

Sustainability Pty Ltd is committed to providing effective security for its employees, clients and assets in all of its operations and worksites.

The co-operative efforts of management, employees and contractors will aim at maintaining a secure environment and in particular protecting our people, property and information against risks of injury, loss or damage from criminal, hostile or malicious acts including the aspects of cyber security. The Company will comply with all regulatory requirements that relate to security activities at each location.

Senior management must regularly review and assess security risks and exposure of the business to ensure that they are properly managed. Security measures are to reflect the risks associated with each location. All staff and contractors must report any security breach that has the likelihood to threaten safety or business activities.

We will continually monitor and improve our security performance so that our activities may continue safely and free from interruption.
